Subject: Tabbed folders, lifted webster icons

Here's a few things I worked on this weekend:

<font-folder.dir.tiff>

<snd-folder.dir.tiff>

<tiff-folder.dir.tiff>

<net-folder.dir.tiff>

First, I wanted to see how easy it would be to twist an image around and make little labeled tabs on normal folders. Here's a few that I did; all 2-bit:

They turned out OK, and it wasn't very difficult.

I just warped the normal font, snd, and tiff icons a bit and then cut and paste using Icon.app

Enjoy

This is a variation on the logo for Adobe's "Type-On-Call" CR-ROM. Sorry that it is only two bit; but it does make a nice .dir.tiff for .../Fonts.

TOCiconB&W.tiff

Enjoy,
