Contents:

Databases - this directory contains sample databases which you can use as templates and inspiration.

;Databases/README.rtf;;¬Description of databases

EntryLists: here are some lists of states and cities which you can import via Define...->Options... ->Entry List -> Import... to add pop up selections to data entry fields.

;EntryLists/READ_ME.rtfd;;¬   Description of Entry Lists

Envelopes: this has a single example: SampleReturnAddress.envelope which shows how you might make a custom return address as your default envelope.

Labels: this directory has all the Avery labels - add these to your ~/Library/Stone/DataPhile/Labels directory for instant access from DataPhile's Labels Window, and to make it a snap to do standard labels with custom graphics. See "FriendsForever" as an example.

;¬;../../Stone_Packages/DataPhile/README.rtf;Manual;¬ Manual - this directory contains the Online DataPhile manual - a DataPhile database which gets launched from within DataPhile.
This copy is here for you to check out - to install, use the DP_Online_Manual.pkg.
