Open Inventor Nodes Quick Reference Release 2.0

Contents

This document provides reference information on Open Inventor nodes. It is especially useful as a quick reference for the Inventor file format. The following sections are included:

• A set of tables grouping node classes according to general usage

• A quick reference table for nodes

1 Node Classes by Category

The tables in this section group Inventor node classes according to usage. The categories are

• Shapes

• Properties

• Groups

• Lights

• Cameras

• Manipulators

SoCallback and **SoEventCallback**, general-purpose nodes, do not fall into any of these categories and are therefore not included in any table. **Boldface type** in the tables indicates an abstract base class.
