Display Driver Uninstallation

The Driver Uninstall utility allows you to safely delete any drivers installed by TINSTALL.   You will be able to delete an entire Driver Set or an individual driver from a designated Driver Set.

To uninstall an entire Driver Set, completes the following steps:

1. Using the arrow keys or mouse, select the Driver Set from the Display Driver Uninstallation Menu that you wish to delete.
2. Once the desired Driver Set is selected, simply click on **Erase** button.   The driver set is now deleted from your hard disk.

NOTE: The Display Driver Uninstallation will not allow you to delete the current driver installed for Windows.   If you wish to delete this driver, please install another driver for Windows first.

To uninstall an individual driver from a Driver Set, complete the following steps:

1. Using the arrow keys or mouse, select the Driver Set from the Display Driver Uninstallation Menu which contains the driver you wish to delete.
2. Once the desired Driver Set is selected, click on **Enter** button.
3. You will now be given a list directory of drivers included in the selected Driver Set.   Select the desired driver from the list.   You may select more than one driver at a time.
4. Click on the **Delete** button.   You will be prompted to confirm deletion.
5. Once all desired drivers are deleted from the Driver Set, click on **Return** button to go to original Display Driver Uninstallation Menu.
6. To delete additional drivers from another Driver Set, repeat instructions **1-5**.
