Playing the Game

Object

The object of *Killer Bees* is to eliminate as many bees as possible without being stung.

Starting a new game

On the Game menu, click New Game or click on the **New Game** button to begin playing.

End of game

When all of your cans of insecticide are gone, the game is over.

Using Insecticide

Use your mouse by placing the mouse cursor on the game display and moving it left or right to move the can of insecticide. Press the left mouse button to spray. You can also use the keyboard cursor keys: right arrow to move right, left arrow to move left, up arrow or space bar to spray.

Getting Stung

Bees will launch stingers at you. If a bee or a stinger come into contact with your can of insecticide, the can will be punctured and you will have to get a new can. When there are no more cans of insecticide, the game is over.
