Read Before You Install SaxLab 1.0.2 Demo

The demo version of the instrument is fully functional. You can do anything with the demo version that you can do with the full version. You can even save your presets. Demo version also include a full range of presets which demonstrate the instrument's capabilities. The only restriction that applies to demo versions is that they emit a noise about onceevery minute. The full version of LinPlug instruments do not emit this noise.

Registration

You may use the demo version for evaluation purposes for a period of up to 30 days. If you then decide to further use you LinPlug instrument, please register your demo version to become a fully licensed version. You can purchase a license on the ordering page www.linplug.com/shop/shop.htm. Then enter your personal serial number you receive from us (normally within 1-3 hours) in the instruments rear panel to activate the full version. The download path for the full version will be sent to you immediately after your purchase (Products on CD take a few days for delivery).

System requirements:

- AudioUnits instruments or VST 2.0 capable host software
- Power Mac, PowerBook, eMac, iMac, Mac mini or iBook with 600 MHz or faster processor (G4 with 1 GHz recommended)
