

What is MacMod Pro?

MacMod Pro allows you to compose and edit professional-quality songs called Mods. Mods are equivalently MIDI songs with the instruments written into the song itself, eliminating the need for extra hardware to play them. External speakers are recommended to enhance the music but are not required.

Registering MacMod Pro

MacMod Pro is shareware and modestly priced at \$25 US currency. To register, choose 'Register' from the Apple menu and click the 'Print Registration Form' button. After you fill out some basic information, a registration form will be printed. Please contact us for site license pricing.

If you do not own a printer: write your name, address, e-mail address, system version, processor type, and ID number (displayed on the Registration dialog) on a sheet of paper and mail it with the registration fee to:

InDweller Productions

P.O. Box 8250

Austin, TX 78713-8250

USA

The key will be sent to your e-mail address. If you do not have an e-mail address we will send it via postal mail.

Note to registered users: Do not install this version over your old copy of MacMod Pro. Doing so will make it impossible to copy your registration. You should install this version onto your desktop (or other folder) so the Installer can copy your registration from your old copy of MacMod Pro.

What's new in version 5.1?

Optimized for MacOS 8!

MacMod Pro 5.1 has a new look under MacOS 8. You will notice a big change in the dialog interface.

Increased stability:

The major goal of this version was to make MacMod Pro more stable.

We have corrected the problems that were brought to our attention.

Support:

You can find the latest version of MacMod Pro at:
