

## How to Configure this PC with your existing Account Details.

### Instructions for Windows 95/98 Users

*IMPORTANT - Print this document before commencing the configuration process!!*

So you already have an Internet Access Account with **Telstra Big Pond® Home** and you want to setup a second or subsequent PC to allow you to connect?

For Windows 95 users, the instructions below require Microsoft Internet Explorer 4.01 to be installed on your PC. *(If you aren't sure if it is insert the Telstra Internet Access Kit disk in your drive, run setup.exe and select "Upgrade to Internet Explorer 4.01")*. This procedure configures Microsoft Internet Explorer to allow you to connect to Telstra Big Pond Home.

Windows 98 users already have Internet Explorer 4.01 installed.

**Please Note: This configuration wizard will NOT allow you to join our service.** It is of use to those who are already members and need to reconfigure their PC to connect using their existing account details. If you are not yet a member of **Telstra Big Pond Home**, use the Big Pond Home Internet Access Kit to join.

Before you can correctly configure your PC, you need to know a few things:

Your Telstra Big Pond Home **Username**.

Your Telstra Big Pond Home **Password**.

The telephone number of the Telstra Big Pond Home **Access Point** closest to you.

Your Username and Password should already be known to you; a list of our current Access Points are included in this document.

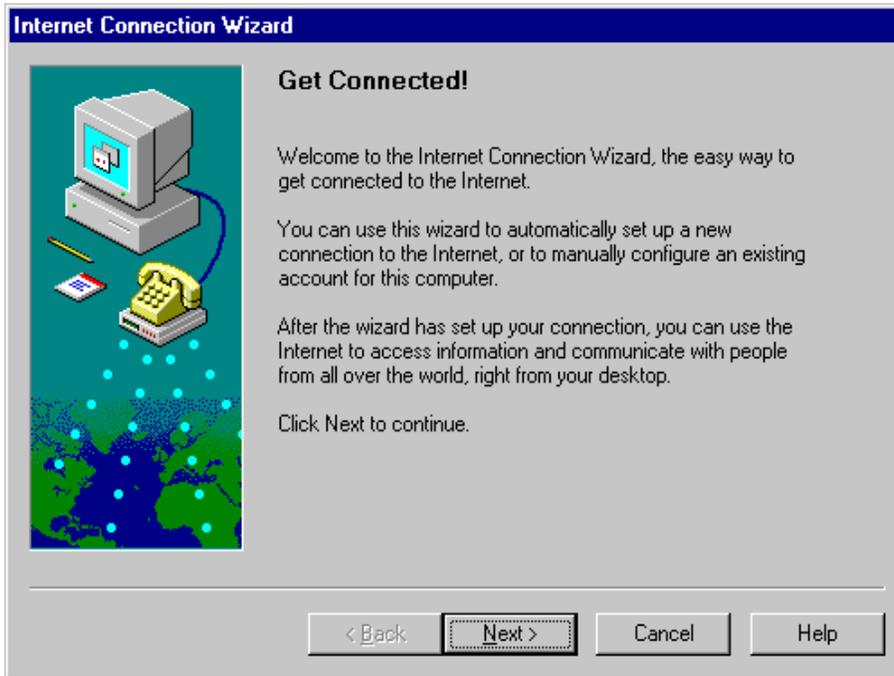

In addition to the above items, you will need the following information;

Mail:	POP3 Server	mail.bigpond.com
Mail:	SMTP Server	mail.bigpond.com
News:	NNTP Server	news.bigpond.com

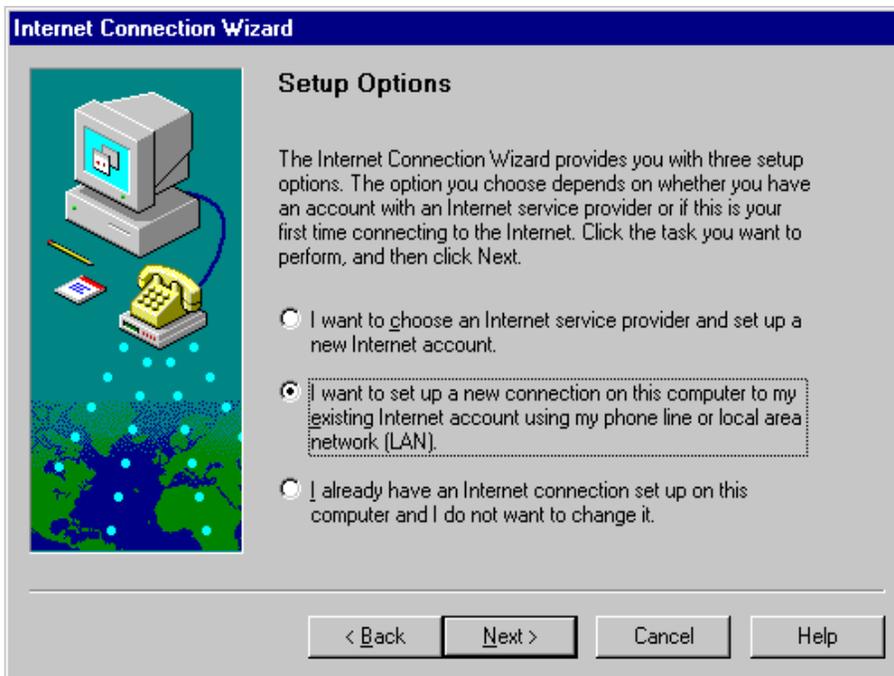

#### **Configuration Instructions**

1. Please review these instructions or print a copy for reference before commencing. To configure your PC correctly, the browser should be shut down.

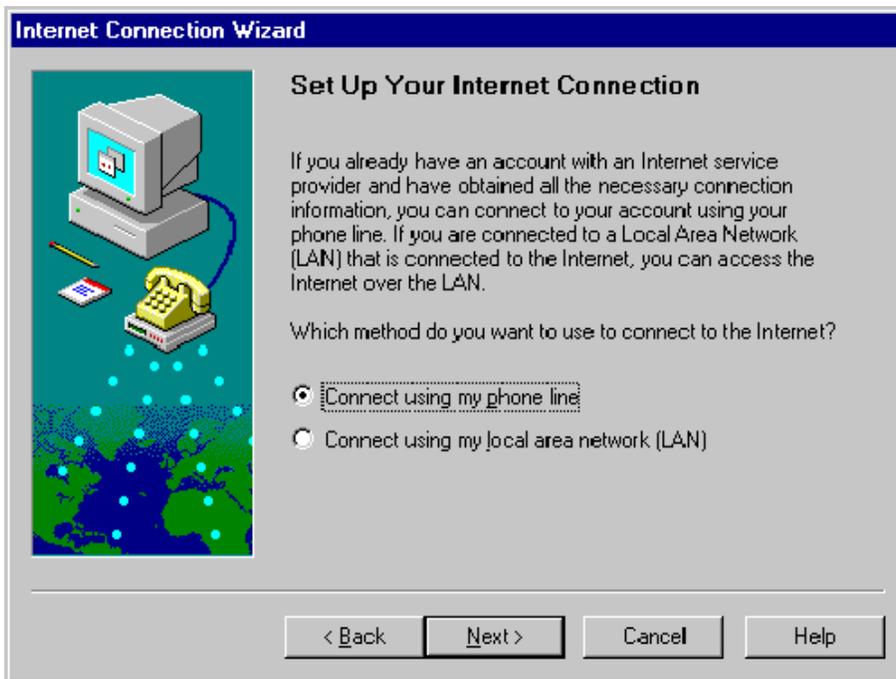

2. Configuring your PC to access the Telstra Big Pond Home Service is easy using the Microsoft Connection Wizard. To start the Wizard, click the Start button on the Task Bar, then select Programs, Internet Explorer, Connection Wizard. This will start the Internet Connection Wizard, as below.

3. On the next screen, "Setup Options", choose the selected option.

4. Most people will be using a Modem to connect to the Internet. If this is true for you, check the Connect using my phone line option.

5. If you don't have the necessary network software on your PC yet, wizard installs it.

6. On the following screen enter the Area Code and Telephone Number of the Telstra Big Pond Home Access Point (Dial-In Point) you wish to call.

**Internet Connection Wizard**

### Phone Number

Type the phone number you dial to connect to your Internet service provider.

Area code:  Telephone number:

Country name and code:

Dial using the area code and country code

< Back   Next >   Cancel   Help

7. Enter the Username and Password of your existing Telstra Big Pond Home account.

Please Note: Entering both your Username and Password here will allow anyone using your PC to connect to the Telstra Big Pond Home service without entering your Password. If your PC is not in a secure location, you may wish to leave the Password field blank and explicitly enter it each time you connect.

**Internet Connection Wizard**

### User Name and Password

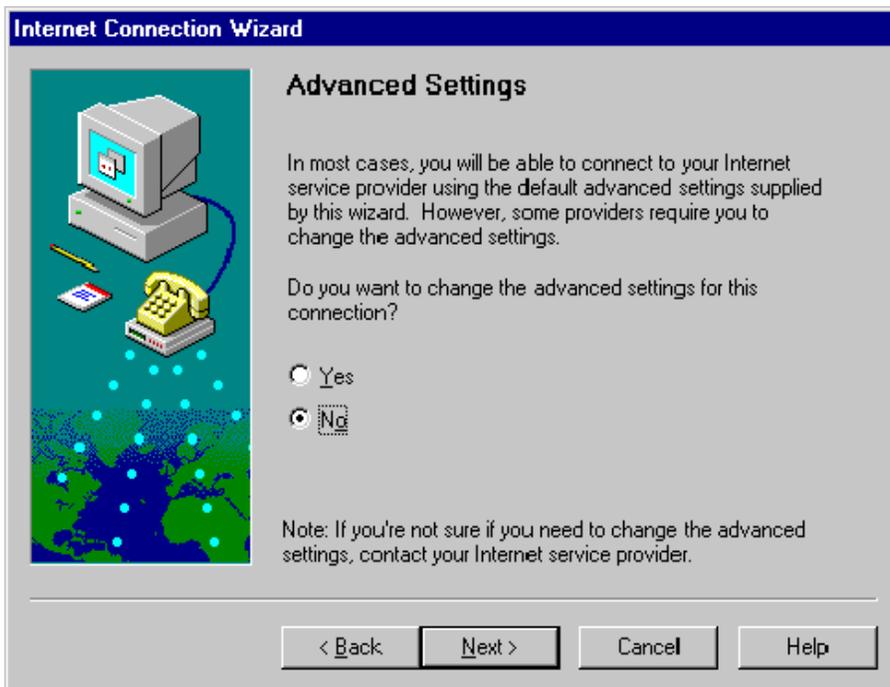

Type the name and password you use to log in to your Internet service provider. This name may also be referred to as your Member ID or User ID. If you do not know your user name and password, contact your Internet service provider.

User name:

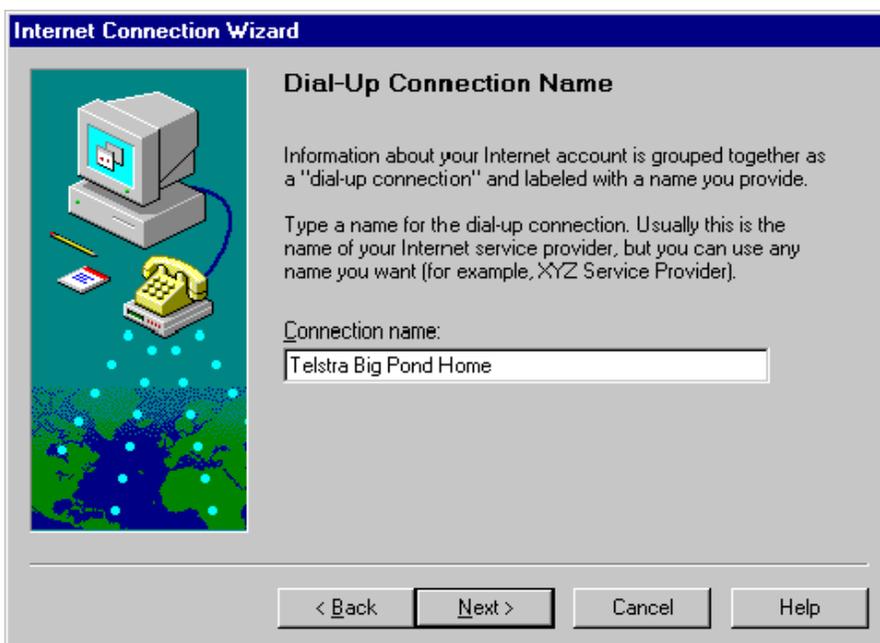

Password:

< Back   Next >   Cancel   Help

8. The Telstra Big Pond Home Service automatically assigns your PC an address each time you connect.

9. Type a Name for the Internet connection object you are about to create.

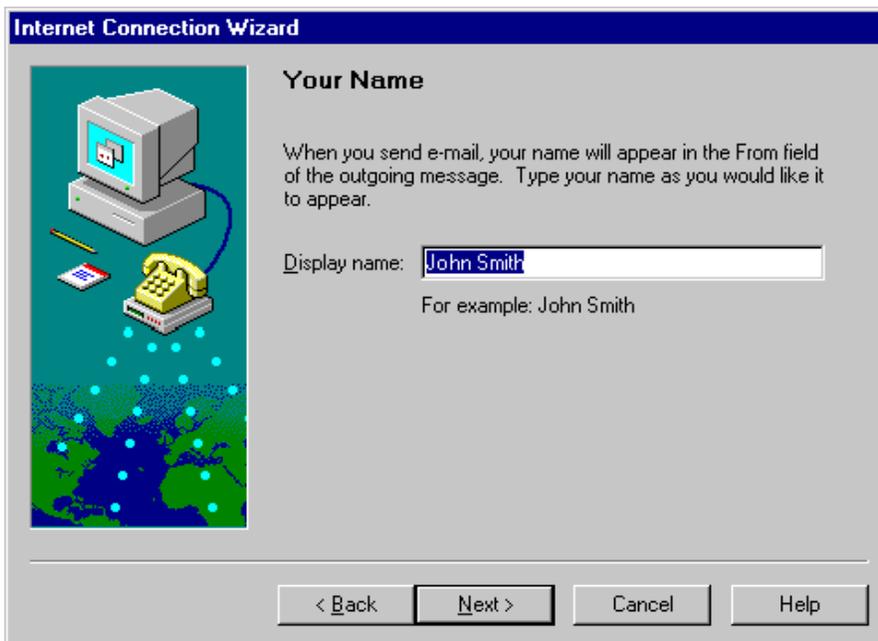

### Internet Mail Configuration

10. Check the Yes option if you want to proceed, alternatively, the first time you run Outlook Express, the Internet Connection Wizard will help you configure your mail account.

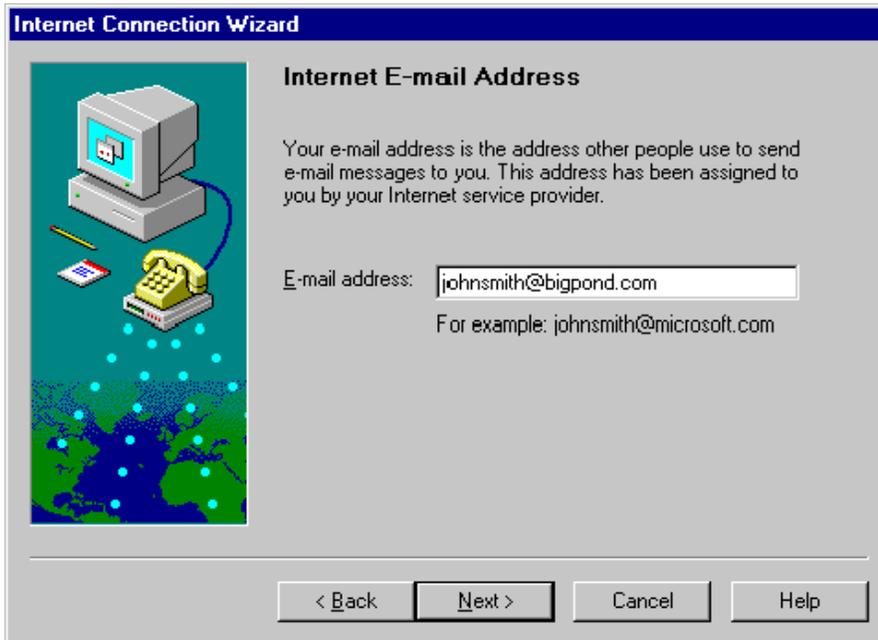

11. Enter your Name .

The Name field will appear in the "From:" line in email that you send. Standard procedure is to set this name as your "friendly" or "real" name. (eg: John Smith)

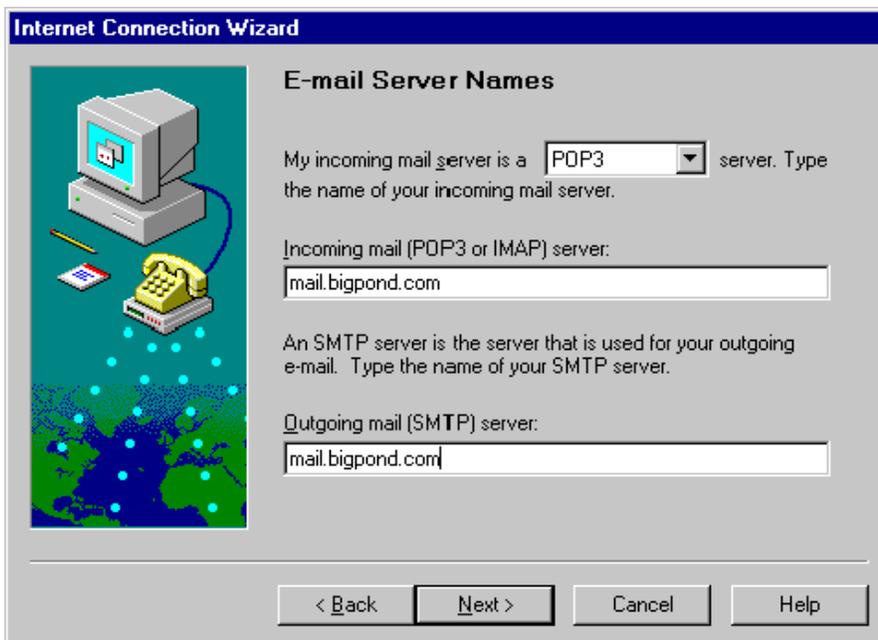

12. Enter E-mail Address.

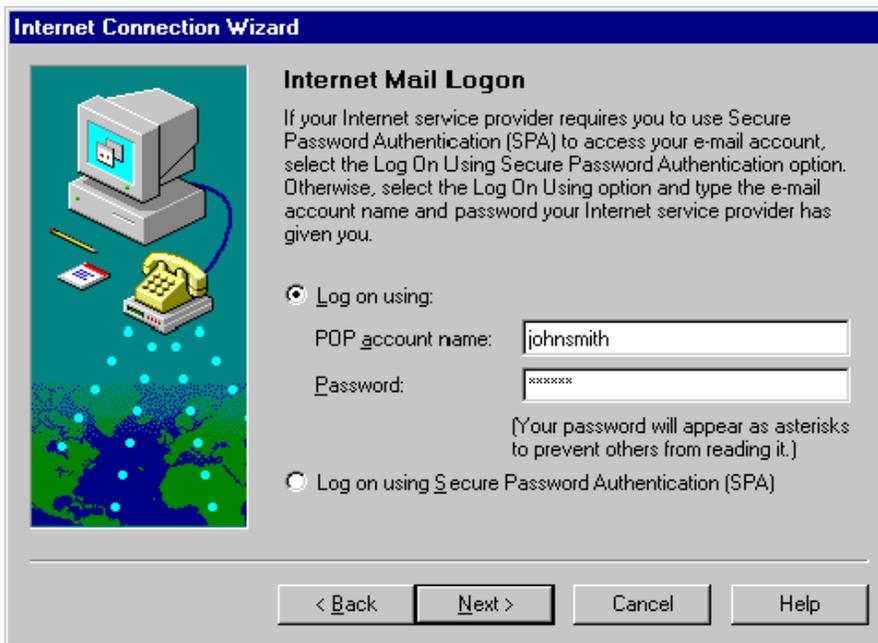

The Address field allows people to reply to your messages. Your Internet E-mail Address is your Username@bigpond.com (eg: johnsmith@bigpond.com) It is important to ensure that you enter your E-mail Address correctly, if you get this wrong, people will not be able to reply to your messages.

13. The Telstra Big Pond Home Mail server's address is mail.bigpond.com, enter this address in both the Incoming and Outgoing fields.

14. Enter your Telstra Big Pond Home Username and Password here. Please Note: Entering your Username and Password here will allow anyone using your PC to download and read your electronic mail without entering your Password. If your PC is not in a secure location, you may wish to leave the Password field blank and explicitly enter it each time you connect.

15. Choose a friendly name for your Internet e-mail account.

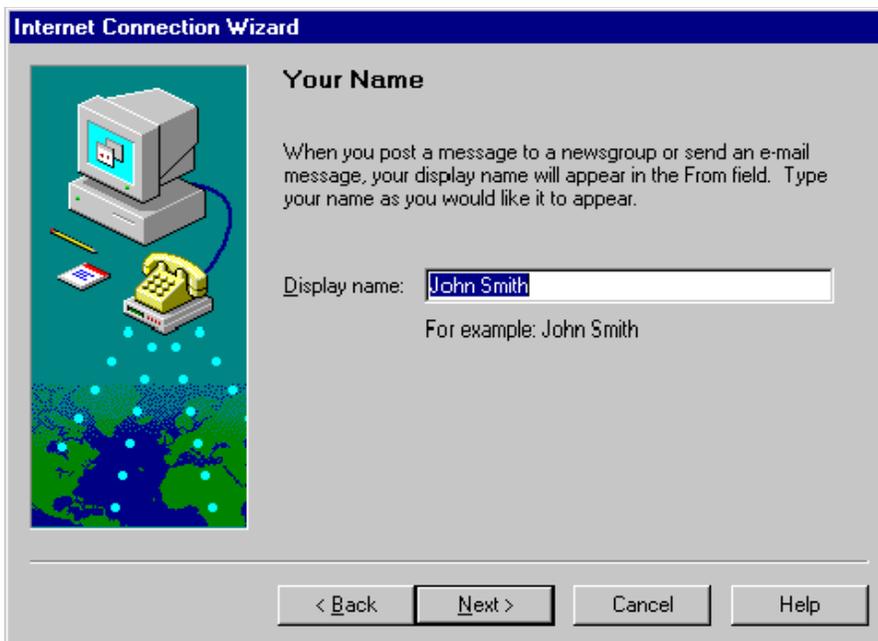

### Internet News Configuration

16. Check Yes option if you want to proceed, alternatively, the first time you run Outlook Express, the Internet Connection Wizard will help you configure your news account.

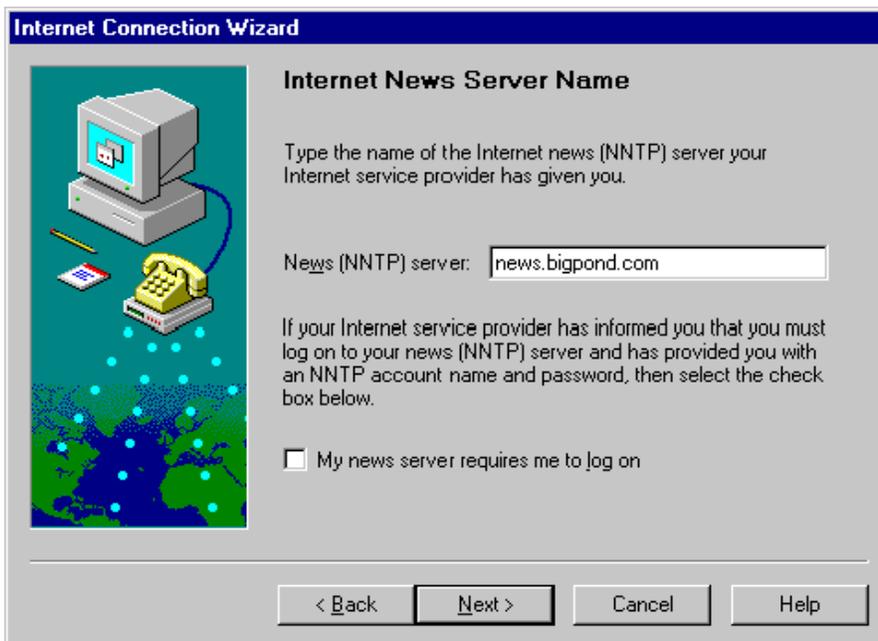

17. Enter your Name. Your Name will appear in the "From:" line of messages you post in Usenet News Groups.

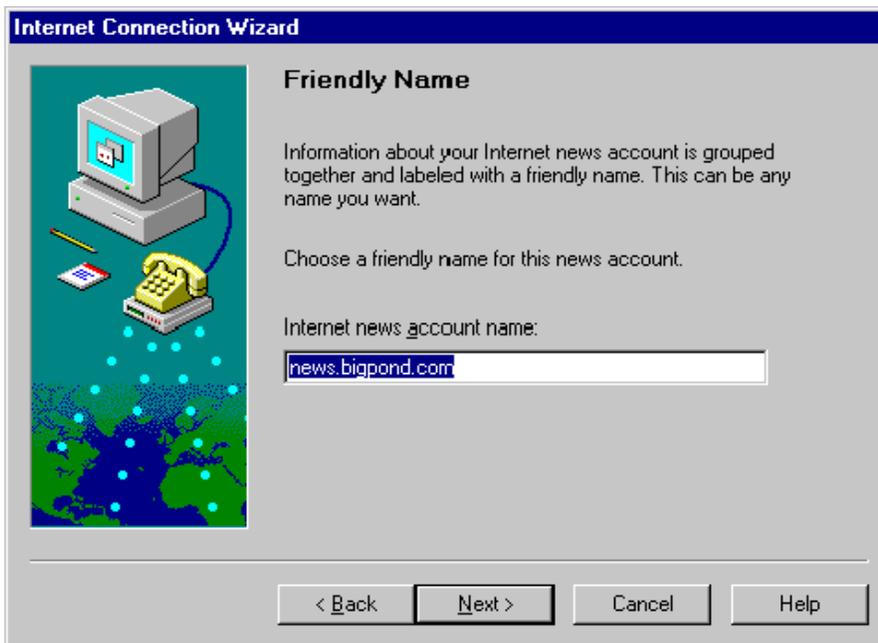

18. Enter your E-mail Address. Your E-mail Address will let people send replies to you directly via E-mail instead of replying to the entire News Group. Please be sure to enter your full E-mail address here. Your E-mail Address is your Username@bigpond.com.

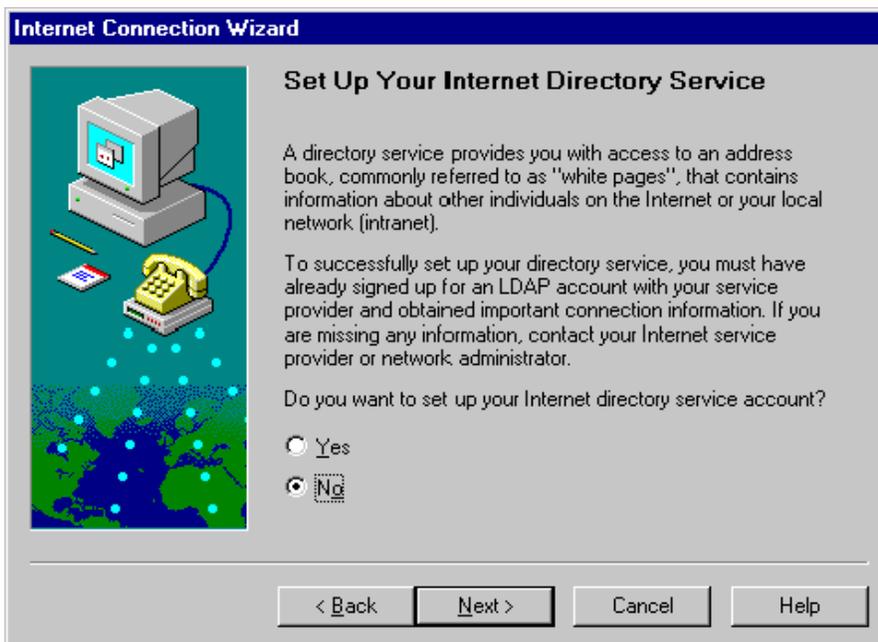

19. The Telstra Big Pond Home News Server's address is news.bigpond.com enter this here. Our News Server does not require you to logon. Leave the box "My news server requires me to logon" blank.

20. Choose a friendly name for your Internet news account.

You are now ready to read Internet News. The first time you connect to the News server, you will be told that you have not subscribed to any News Groups and be given an option to view a list of available groups. Select Yes to get a current list of available News Groups. This will take a couple of minutes.  
21. Choose the default option No if you don't want to set up a directory service.

22. This ends the connection configuration, click Finish. Once the Wizard has finished, you will be able to connect to the Internet by double-clicking the Icon titled Internet Explorer on your desktop.

**Access Numbers**

Updated on 1 July 1998

Local Call Access: As a rule of thumb, if you can call the location of the Access Point (if it has a slash (/) in its name, the actual location is the name after the slash) for the price of a local call, you will be able to connect to our Access Point for the price of a local call. If you are unsure, you can check that the Telstra Big Pond Home Access Point is a local call by calling Telstra, free, on 012, quoting both your phone number and that of your local Access Point.

\* Calls from mobile phones are charged at the applicable mobile rate.

BETA\*\*\*: The Access Point is undergoing final testing before being announced "live". You can use it, however its availability or performance may not be perfect yet.

All live access points can be accessed by a standard modem and are also equipped with K56flex technology enabling access via a K56flex modem.

The Telstra Big Pond Home Service is provided by On Australia Pty Ltd, a 100% owned subsidiary of Telstra Corporation Ltd.
