
BreakThru Demo
Read Me
6/13/94

In the award-winning tradition of Tetris, comes BreakThru! Only this time your goal is to make as many bricks disappear as you can before time runs out. Click on a group of same-colored bricks to remove bricks and make the wall come tumbling down. See the BreakThru Demo help file for more instructions.

System requirements

To run the BreakThru demo, you need an IBM 80386 compatible, Windows 3.1, 4MB RAM, VGA or Super VGA graphics and a hard drive. In addition, the demo supports a Sound Blaster or compatible sound card for music and sound effects.

Installation instructions

Copy the file BRKDEMO.EXE to the root directory of your hard drive. Type "BRKDEMO" at the DOS prompt. The installation program will create its own directory (\BRKDEMO) and will copy all the BreakThru demo files to that directory.

Loading instructions

To run the BreakThru demo, select "Run" from the File menu. In the Command Line box, type "C:\BRKDEMO\BTDEMO.EXE." Or you can select the Browse button instead.
