

## **CHOPPY THE PORK CHOP**

**This is a game I made for Windows usind Klik and Play. It is entierly freeware. In it you are a pork chop that must fight off evil teeth, mops and hamburgers.**

**I waould suggest using a 486 for it but it will probably still work on a 386. It supports a soundcard, so if you want to get the most out of this it would suggest you use one.**

**Unzip it in a diferent directory than the one you want to install it to and run the setup.exe file.**
