

# RABBIT 1.0

This is a program that I just created in a Afternoon. The Executable file is Rabbit.Exe . Other than this file that should be the only file in the archive. Also needed but not included is "VBRUN300.DLL". It can be gotten almost anywhere that Shareware is distributed. A sound card is recommended. This program runs only under windows 3.0+.

Rabbit 1.0 is FreeWare feel free to give copies to your friends and enemies. Although I would like feedback for my efforts. if you Like Rabbit (or if you don't). (e-)Mail me, my address is Treker L@Aol.Com.

And, As always, the Author of this program makes no claims At all, And takes no responsibility for system problems, Data loss and any thing else. (Although any of those would be unlikely). In other words : USE AT OWN RISK

## Treker L
