New Features Since Super Craps 1.0

MIDI Soundtrack Feature

A **MIDI** Soundtrack option has been added for those of you who might wish to listen to some background music while you are playing **Super Craps**.   The game plays standard **MIDI** files which are named "*craps#.mid*", where the **#** is a number from **1** through **9**.   You can copy your favorite **MIDI** files to the filenames "*craps1.mid*" through "*craps9.mid*", and **Super Craps** will cycle through these as you play the game.

Auto Dice Roll

If you disable **Auto Dice Roll**, pressing the right mouse button will start "*shaking "*   the dice, and pressing   it again will "*throw*" the dice.   If you enable **Auto Dice Roll**, the game will function as it did in Super Craps Version 1.0 .   This option is available in the **Game Options** extended dialog box.

Place Bet On/Off Feature

It is now possible to toggle your place bets **on/off** as you wish, such as turning them on during the comeout roll, or turning them off when you feel the dreaded **7** coming.   The bets will remain on the table, but will be inactive until you turn them back on.

To select this feature, click the left button on one of your place bets .   A popup window will appear with two of the options being **Turn Place Bets On**, and **Turn Place Bets Off**. Whichever option is currently in effect will appear grayed.

Place Bet Repeat Feature

When you win a place bet, a popup window will appear allowing you to **repeat the same bet**, **press your bet up**, or **remove** your bet.   This is an automatic feature, and does not need to be turned on or activated.

New Dialog Boxes

The game options dialog boxes have been changed slightly to accommodate some new features and options.   They should be self explanatory and easy to understand.

New Bet Area Cursor

When you have moved the cursor to a valid betting area, the cursor will change to a #2 dice shape.   The current betting area is displayed at the top of the screen as the window title.
