To Do

Figure 2.27 **To Do Calendar** stack button

**To Do** is a stack that contains one card for each week in a year. Each card has six scrolling fields that allow a user to post little notes in each field for chores to do that day. Saturday and Sunday use one field. These chores can be posted from January to December of one year. At the last day of the year, there is a button on the last field that lets you create enough cards for another year (Figure 2.28 above).

There are three buttons on this card that need to be mentioned also. They are :

**Left Arrow Button** - will send user to next card of this type. Each card corresponds to one week, so the next card will be the previous week.

**Right Arrow Button** - will send user to next card of this type. Each card corresponds to one week, so the next card will be the next week.

**Return Button** - will send the user to the **CS Lab** card of the **Logger** stack.
