Figure 2.23 Example text card of **Consultant Notes** stack

Consultant Notes is a stack that works like indexed notecards. It contains a text filled card for each class that is offered that concerns the lab (Figure 2.23 above). In these fields, special notes may be posted to other consultants about problems and ideas concerning each subject. There are also buttons corresponding to the 'Notes' for Consultants immediate viewing, Unix, vi, and an 'Other' section for miscellaneous items.

Buttons on this card that need mentioning are :

To Do Calendar Button - sends the user to the **To Do Calendar** stack. Once there, clicking on the **Return** button, or pressing the Enter key, will return the user to the **CS Lab** card of the **Logger** stack.
Left Arrow Button - will send user to previous card in this stack. Each card contains a scrolling field used for entering comments concerning that topic.

Right Arrow Button - will send user to next card in this stack. Each card contains a scrolling field used for entering comments concerning that topic.

Return Button - will send the user to the **Logger** stack.

Tab Buttons - There are 11 tab buttons on this card. Each button corresponds to a tab in the bottom of the page of the first card with the label **Consultant Notes**. On our logger, they correspond to "Notes", "CS101", "CS 211", "CS 212", "CS 213", "CS 312", "CS 315", "CS 471", "Unix", "Other", and "vi". These buttons send the user to cards with scrolling fields for notes about each topic that are useful.
