

The ultimate file and applications organizer. Combines all the functions of PowerStation and DiskTools, giving you instant access to your applications, documents and desk accessories, without hunting through folders. File Director allows you to organize files according to your work style and to rearrange them whenever you like; it offers complete file control without quitting your application. You can open multiple documents, even if they're in a different folder or disk. An inbuilt print spooler lets you print your files in the background, while you continue to work. Streamline your work with instant access to calculators, telephone notepad and autodial, appointment calendar, printing and window utilities.
