

Master, duplicate and serialize disks simply and quickly - hundreds of times faster than working with a floppy. Instead of using a floppy disk, create your disk image in RAM and zip through your changes.

DiskMaster is fully compatible with Apple Disk Copy. Read, write and mount Disk Copy compatible image files and eliminate many of the steps associated with mastering and duplicating floppies.

With DiskMaster's unique serial number feature, give each of your duplicated floppies a different serial number. DiskMaster's flexible serialization even lets you configure alpha-numeric serial numbers.

Disk Master Pricing;
1 copy; £59.00.
