

DiskDoubler: Double your disk space by compressing files for faster data transmission, backup and copying. With a click of the mouse, shrink, combine or split files, to fit twice as much data on your hard or floppy disks. A file, folder, or entire disk can be compressed or expanded just as quickly. AutoDoubler: Just double-click and AutoDoubler is installed, once and for all. It compresses only when you need extra space, without interrupting your work. You can use your files and applications while they are still compressed, saving even more time. Files are protected during power failures, disk errors and system crashes. AutoDoubler automatically doubles the space on hard disk, cartridge drives and optical disks and is 100% compatible with DiskDoubler. For ultimate flexibility, use both together.
