

Why buy a separate backup or file manager utility? Save time, stay organized, and keep one step ahead with Magnet™, which creates agents to automate a wide range of repetitive tasks. It gives you a fast find-file utility; scheduled backups; reliable filing; different view options. Magnet™ is the first product to automate updating and distributing shared files. It can browse other disks or the network for items of interest - while you work in another application. It will keep your desktop and PowerBook in synch. It supports System 7. It will work to any schedule. And it's easy to use.
