Manages network, printer and fax connections for your PowerBook. On the Road will defer printing and fax tasks until you reconnect and then remember to send your documents to the printer. As soon as a phone line is connected to your PowerBook's internal modem, it will send your deferred faxes. On the Road will set up your working environment wherever you are; and will automatically reassign documents to similar printers at different locations. It will turn AppleTalk off when you don't need it, to save your battery, and switch it back on when you reconnect to a network.

On The Road Pricing;
1 copy; £69.00. 3 copies; £160.00. 5 copies; £225.00. 10 copies; £399.00. 25 copies; £699.00.
