

Give your work that little extra oomph - make your presentations stand out - with addDepth's 3D text and graphics. It gives your work a new perspective. And it's so easy to use - just open addDepth and start typing. Or import graphics from other applications. You can experiment with rotation and perspective on-screen. You have full control over depth, bevels and colour.

addDepth exports editable Adobe Illustrator and Aldus Freehand files. It supports all TrueType and Type 1 fonts and CMYK and RGB colour selections. addDepth also supports System 7.
