

Typestry makes creating 3D text incredibly easy. There are very few controls to master, the tools are practically self-explanatory, and the interface is straight forward, but you can get an incredible range of lighting perspective, reflection and shading effects. Pixar Typestry is an ideal product for those who are creating logos, brochures, newsletters, ads, and slide or multimedia presentations. With Typestry you can add beautiful chapter headings, bullet points, titles and highlights to your documents. Typestry users have created wonderful posters, business cards, pictures for their children's rooms, greeting cards, manuals and promotional flyers.
