

SAM is the world's best-selling Virus Protection Program. It offers state-of-the-art virus protection - and it's easy to use. It detects and removes viruses in seconds. It is the only virus protection program that can scan compressed files under System 6 & System 7. It is the only program that scans automatically at pre-scheduled times. Its automatic, transparent background monitoring provides the best protection against known and unknown viruses. It's easily distributed and updated over networks. No wonder MacUser gave it a coveted 5 Mice rating, and made it the winner of the Editors' Choice award.
