

No more frustrating waiting while your Mac (and anyone else's on the same network) joins the print queue. SuperLaser Spool controls your printer in the background while you continue working in the foreground. You can get on with the next task in seconds, rather than minutes - or hours. With the LaserQueue Desk Accessory, you can preview spooled documents, change network priority, delete or change the printing order of your documents, or choose to print from the first available printer. Works with stand-alone or networked Image Writers, LaserWriters, HP Desk Writers and PostScript compatible printers.

SuperLaserSpool Pricing;

1 copy; £89.00. 10 copies; £699.00. 25 copies; £1675.00.
