

Drive7™ is the universal hard drive updater & formatter for the Macintosh. And it comes with Drive7rem - a universal removable device driver CDEV for Syquest, Bernoulli, many optical and CD-ROM drives.

Drive7™

- Replaces multiple formatters
- Update most third party hard drives
- Virtual Memory on removable drives
- Choice of icons with Optical SCSI ID

Drive7rem™

- Display SCSI Bus information; Manufacturer, Model, and ROM revision
- Selectable installation of removable driver
- Set partition attributes; Locking, AutoMount and passwords
- Selectable boot partition

Supports SuperMac's proprietary SCSI formatting.

Drive7 Pricing;

1 copy; £45.00.
