

Avoid burn-in damage to your Macintosh screen. Burn-in occurs when a display is constant over a long period and its image is etched into the screen. Pyro! darkens the screen and substitutes a mobile display (selection includes Fireworks, Restless Clock, Dimwit, Kaleidoscope, Aquarium and many more). With Pyro! in your System folder, the moving image will automatically activate after your system has been idle for an interval. Its active display will continue until you click the mouse, press a key or insert a diskette; or you can opt for a special password to 'wake up' your Mac. Compatible with all Macintoshes, System 4.1 and later.

Pyro! Pricing;

1 copy; £29.00. 10 copies; £249.00. 25 copies; £599.00.
