
About This Document

What's in This Book?

We at McAfee Associates know you are anxious to install WebScan. We want you to get started as soon as possible, so we have provided this Getting Started Guide to help you install the product quickly and easily. After you've completed the installation, you can use the checklists in this manual to begin learning to use WebScan.

Here's what you'll find in the rest of the manual:

2

“Product Overview”

Gives a brief description of each component of WebScan and lists the benefits the components provide. Also included is an introduction to other McAfee products and services.

3

“Installing WebScan”

Supplements the Installer with step-by-step procedures for you to follow as you install the product. It also points you to the checklists that help you get started using WebScan.

4

“Component Checklists”

Provides individual checklists that you can use as tutorials to help you get started using WebScan's components.

5

“Making WebScan Work for You”

Provides real-life examples of using WebScan to help you make optimal use of the product.

Appendix *“Directory Listing”*

Lists and describes the directories and files created during installation of WebScan.
