imitations of TrashScan

TrashScan can be a helpful tool, but you must remember that it is a relatively simple tool.   Nothing can take the place of a good firewall.   And there are very good comprehensive software packages available that can help you keep your computer secure.   But TrashScan can be surprisingly effective, and it's free.   Plus, it only runs when you need it to, and requires only about 1 Megabyte of RAM.   The decision is up to you.
