Other Buttons

Return to Previous Topic will return you to the Axia topic that is currently already open, with the two-window comparison screen. If no Axia topic has been previously opened, this button will not be shown on the current screen.

Exit to Windows will take you out of Axia completely and back to the Windows desktop.

Information will give you the page you are looking at now.

F1 (on your keyboard) will give you Help on Help

To return to the Menu Screen

Click on this button...

Or, select '**Exit**' from the '**File**' menu at the upper left corner of this window.

For Help on Help, Press F1

Multimedia Presentations

Six exciting multimedia presentations explaining the many different types of bird songs, where birds can be found singing and many of the features in this Axia package.

Songs and Voices

Explore all the common bird songs at once or by different types of songs - from Musical Songs to Croaks and Squawks. An exciting challenge is the topic 'The Birds in Chorus' - bird songs as you will hear them in the wild.

Where the Birds Sing

Different birds can be found in different types of habitats. Clicking on this button will bring you to a menu page with 17 different habitats - from Arctic Tundra to Swamps. Once you pick a habitat all the species that may be found in that habitat will be presented for you to explore.

Habitats

Here you will be able to explore the different types of habitats where birds can be found. In all the topics the items are the different types of habitats and your challenge will be to identify where a bird species may be found. Real experts will use Multiple Answers in the topics and be able to recognize where all the choruses can be heard.

Regions

Clicking this button will bring you to a map of North America with 8 different regions. You can then pick a region and open a topic which has all the common bird songs for that region. You will be able to hear the bird songs, see their pictures, look at the songwaves, see the range for the species and see the habitats where they may be found. You can also choose All Regions and see the birds that can be found in each region. Real experts will know all the regions where a bird can be found.
