Digital Type Foundry Read Me

This type face was produced using Fontographer 3.3 on January 11, 1992 by James Banner at DTF. There is no absolutely charge for using this font. If it is used in a package with other software the Author would like a copy of the finished product in exchange for the use of the font.

The font "Angelic" is based on the 12th century psuedo-cryptic Hebrew script that was used in "books of magick" or "black books". The face was generally used in transliteration of various words of power within sigils or characters. I came to need this type face while preparing a short work by Cornelius Agrippa. Agrippa called the face "Celestial". The Hebrew equivalent of the Angelic letters are as follows

a b g d h v c e

y

a b g d h i c t i

k l m n s i p q r w

t

k l m n S o p q r s T
