Usage of the Dictionary

Anwendung des Wörterbuchs

Starting this program will show up a window with entry field and a list. Type the sought word in the entry field (or just the first part of it) and the appropriate entries will be shown in the list.

To pick a word out of the list, click on that word in the list. Clicking on the right side will also exchange the columns with the English/German headings.

With the appropriate Buttons you can expand the dictionary and you can do other manipulations.

If the program is activated, either by Alt-Tab or mouse click, the contents of the Windows clipboard will show up in the edit field. The list is updated accordingly.

If 'active in background' is checked, the window will pop-up automatically if another word is copied into the clipboard, regardless which program you are using. With Alt-Tab you can switch back to the last used program.
