

## ***Genie Math***

The registered copy of ***Genie Math*** will not have the annoying registration screen. The registration fee is only \$17.50. I have kept the registration fee low to encourage sales.

GENIE MATH is intended to be a fun learning tool for children ages 4 to 10. Problems are presented to the player in addition and subtract. This is done one problem at a time in a flash card fashion. The player can adjust the time limit, difficulty, and number of questions. You can adjust the level of difficulty from  $1+1=2$  to  $555+444=999$ . You can also review the problems that were missed. By teaching the children to recognize the simple math problems by sight and not counting on their fingers, they build a good mathematical base to continue their education. Just five to ten minutes a day, four times a week will greatly increase their ability and speed.

Please send \$17.50 to :      Buzz Carter
