

# Mom Hack With Inter Application Breaking and Entering (IABE)

## What it is

It is an FKEY (F 9) that plays the game Mombassa.

## How To Use It

Start Mombassa.

**Important! You must do this step:**

Remove a pair of tiles and put them back by selecting Undo.

Press Command-shift 9 to start Mom Hack.

Watch it solve Mombassa.

Hold down the mouse button to stop it. This may be important since some boards may be unsolvable.

## Why It is Cool

Mom Hack works by calling Mombassa's functions from my FKEY, hence the name Inter Application Breaking and Entering. And I did it without seeing source code.

## Who Did This

Jeff Walker

1069 Barton Drive #212

Ann Arbor, Mi 48105

Don't forget Glen Whichman, he wrote a cool game and deserves your shareware support.
