

How to use Neutron Bomb

It is a system extension, install it in your Extensions Folder.

What it does

It helps you play Spectre 1.0.

Press the 9 key when you get in trouble. It should freeze the other tanks when playing against the machine. Press it again if you get bored.

Press the 8 key if you get really bored (warning, it will end the game without recording your awesome score). Press any key to end this display.

Credits

Jon Wätte wrote the init and did all of the hard work.

Jeff Walker had the idea, found the places in Spectre to patch, and marketed.

Paul Hertz drew the cool icons.
