

About the Parallel Software...

Well, there is some good news and some bad news... Due to time constraints (alternatly called "real-life" or "work"), the Parallel software is not available to be placed on the MacHack '93 CD-ROM.

The good news is that the software (along with additional documentation beyond my paper) will be available on online services. I will be uploading it to America Online in late July or early August (probably before you actually get this CD-ROM), and it should make its way to other services shortly thereafter.

I appologize for the inconvenience, but the download will only take a few minutes. If you can't connect to one of the major online services, you can call me at my office number to arrange for a copy to be sent to you.

Thanks for your understanding.
