

MEGA-MAN ICONS

These Are 256-Color Icons
Of Mega-Man, His Allies,
And Most Of His Enemies.
They Are 48X48, But Look
Better When Used As 32X32.
I Used **Microangelo** To Make
Them.

Four Of Them (Megaman X), Icons
Come In Standard **ICO** Format,
The Others Are In *ICL FORMAT*, Just
Use Them Like You Would With Any Icon.
Except When You Are Browsing For It,
Move The Menu At The Bottom From Icon Files
To All Files, Browse Till You Find The ICL,
Then Select It. And There it Is.
