

Icon-Hear-It Cursors.

Back When I Had 3.1, I Bought
A Program To Decorate My Desk-
Top Called "**Icon-Hear It**",
It Consisted Of A Program That
Played **MVE-Files**, Animated
Icons, I Enjoyed This Program
For Three Months, I Got Bored,
It Made Windows Slower.

Then I Got **Windows 95**, Then
Plus!, And Finally, **Microangelo**.
Microangelo Had A Program Called
The Librarian, I Wondered What
Would Happen If I Opened A
MVE-File. So I Did, I Saw The Icons,
That Made It Up, I Copied Them To
The Clipboard And Pasted Them On
The **Icon Animator** And Presto! I
Created Animated Cursors, These
Animated Cursors.

So Here They Are, Enjoy Them!
