Organizer v1.0 1994

(GiftWare)

Since Program Loader & Mini Program Loader is Giftware you are

encouraged to send the author a present, money, a postcard, etc.

If you use it.

I use my Amiga as a hobby all I really would like is some Info

back to let me no what you think of my programs.

AUTHOR.

K.Winspear using CanDo 2.0

WHY DID I MAKE THIS PROGRAM?

I wrote this program because it may sound funny put i wanted to

see if i could make a Database program and i am quite happy with the

finished product. It look's good and works well.

Return

1.3 installer

HD-INSTALLER.

There are Three programs to Organizer. they are:

Organizer

Organizer.TXT

HPR

Also for the Programs i used a Highspeed requester called 'HPR' it's in

the c: Draw. The installer install's it all for you.

NOTE make sure you have Delete in your c:draw, I did not include that

in the installer program because Delete is with your WORKBENCH. But it is

in the c:Draw of this disk anyway.

FOR HARDDRIVE & Disk YOU WILL NEED:

Organizer Can go any were on your HD or Disk

Organizer.TXT Go's in your s/Draw

HPR Go's in your c/Draw

Double Click on HD-Installer icon, Once started and on view, just

click on the Org.Install button, this will automatically install

'Organizer' and the other files were they should go. Organizer is coped

to your main Directory on your HardDrive.

INSTRUCTIONS.

Well Organizer is a database, when you first load it, Press the

Delete button to delete my Name & Address and then all systems go. Click

the mouse next to the word name and type your name & Address in.

NEXT.

Click the Next button for the next page, If there is only one page nothing

will happen. Always click Next or the Prev button after you have finished

typing your address to let Organizer no you have finished with that card.

Prev.

Click the Prev button for the Prev page, If there is only one page nothing

will happen.

Add.

Add will give you a new card so you can add another name & Address.

Delete.

Delete will delete that page.

Quick.

Will take you to another window with a box with your Names & Phone numbers,

use the scroll bar to move through the names, when you see the name you

want double click that name and it will take you back to the main card

only this time with the name & Address off the name you double clicked on.

Right Mouse.

Now click and hold down the right mouse button for the menu, in the menu

you will see the word project move the mouse over the word and you will

see in the menu there is, LOAD, SAVE, ABOUT, QUIT.

Load.

Load will load your data in, from a file requester.

Just click on the directory to enter it until you can see the file of

your choice, By DOUBLE clicking on the file name, will load that data, as

long as it is the right kind of data.

Save.

Save will save your data in, from a file requester.

Just click on the directory to enter it until you can see the file of

your choice, By DOUBLE clicking on the file name, will load that data, as

long as it is the right kind of data.

You can save different file names if you want, more than one set

off Address.

About.

Will bring up a window up with my name & Address in it, Click on OK to get

back.

Quit.

Will quit the program Don't forget to save your Data?

Sleep.

This is a little sneaky click on the word 'ORGANIZER' on the Main card

and the Quick card and it will send the program to sleep, to wake up the

program just click on the word 'ORGANIZER' and up it pop's.

CANDO USERS....

Any CanDo users out there if you want any tips on how to put a

program together like this one, I will be glad to help you. Or if there

are any CanDo users who can give me any tips. I will be grateful.

Contact me at address below.

Return

1.6 changes

Changes.

I no there are better Database's out there but this only took me a few

hours to put together. If you would like anything adding or changing let

me no and I will see what I can do.

Return
