### 1.2 Description

Description  
=====

I decided to make this little utility to simplify use of mpegA utility of great Stephane Tavenard. Actually this 1.1 version of MPEG AUDIO GUI support all the options of mpegA 1.1 version (see the documentation of mpegA).

Remember that this UNREGISTERED version of MPEG AUDIO GUI V1.0 have some restrictions:

- Start with "about"
- Have a delay time
- Can't use AIFF and quality options

- Can do only one PLAY or DECODE event!

The registered version support all the available options of "mpega" and all the restrictions will be removed.

## 1.3 Installation

Installation

=====

To Install MpegA\_GUI on your HD simply double-click "Install" icon. The installation procedure use the standard "C:Installer" program of Commodore Amiga.

## 1.4 Distribution

Distribution Conditions

=====

This program is copyright (c) 1995 by Francesco Gambino. It may be distributed this unregistered version freely under the condition that no profit is gained from its distribution, nor from any other program distributed in the same package.

All files that are part of this package have to be distributed together and none of them may be changed in any way other than archiving or crunching.

## 1.5 System Requirements

System Requirements

=====

You need :

- o Kickstart 2.04 or above
- o at least a 68020 CPU
- o mpega command in your C: directory  
(NOTE: mpega is copyright (c) 1995 by Stephane Tavenard)
- o GadTools.library in LIBS: directory
- o XEN.font 8 in FONTS: directory
- o ASL.library in LIBS: directory

---

## 1.6 Disclaimer

Disclaimer  
=====

This package is provided "as is" without warranty of any kind. The author assumes no responsibility or liability whatsoever for any damage or data loss caused by using this package.

## 1.7 Registration

Registration  
=====

If you want to register MPEG AUDIO GUI V1.0 please send 7\$ (dollars or the equivalent in Italian coin) with your full name and address to:

Francesco Gambino  
Via Corrado del Greco, 40  
00121 Ostia Lido (Rome)  
Italy

E-MAIL: MC6144@mclink.it

and I'll send to you your personal serial number fast as possible!

When you'll receive serial number use "KeyMaker" program (present in this archive) to create the registration keyfile.

Remember that registered version are ONLY your personal copy! You can't copy freely the registered version or send your personal keyfile to anyone! Respect the laws, please!

## 1.8 Options

MpegA\_GUI Options  
=====

Descriptions of available buttons:

- o INPUT           - Select Mpeg input audio file (.MP2)
  - o OUTPUT          - Select Mpeg decoded output audio file
  - o Freq Div        - Modify the Freq Div between 1-2-4
  - o Quality         - Modify the quality between Worst-Best  
                  (Note: Best is available in the registered version!)
  - o Shift Bit       - Implement the output Shift Bit option
  - o i               - See the "about" window
-

- o PLAY - Play the current mpeg audio file in standard Amiga 8 bit audio mode.
- o DECODE - Decode input mpeg audio file to output file
- o AIFF option - Use this option to create an AIFF output file (Note: Available only in the registered version!)
- o Mono Output - This option make a MONO output audio file
- o Audio Filter - If active make audio filter ON! This function have effects only when use PLAY mode.

## 1.9 GoodBye

Good Bye  
=====

Thanks to Stephane Tavenard for great MPEGA command line utility.

GREETINGS to: Mr.Black, Gino Latino, Nightbreed, Zeus, Iris, Asphix, Necron, Tron, Scorpio, Alexander, Cibberone, Roby, Stefano, Alexander, Sauro and all the registered users! ;-)

"Only AMIGA make it possible!"

Francesco Gambino (ITALY)
