Guide for the Catalogs from ME#?

Please overlook my mistakes in the guide,
my englisch is very bad.

This is a short indroduction to create new catalogfiles
for my Programms.

When you translate the CD-File please insert for the Key
upper-Chars, because the test which Key is pressed works
with upper-Chars (bclr #5,d0).

Only by Gadgets with to ways (Listview, Cyclegadgets).
becomes a lower-Char.

OK?!
