MEReset

1.1 Index

Guide for MEReset V2.1 (10.02.1997)

- Copyright/Autor
- Requirements
- What do MEReset
- Installation
- Using
- History

Please overlook my mistakes in the guide,
my englisch is very bad.

When I become no feedback to this program, the program
has no future. I have not enough time to develop this
program only for me.

1.2 Copyright/Autor

MEReset is GIFTWARE! , that means, you can copy and use it,
but wehn vou use it often you should send a gift!
All rights reserved.

You use MEReset on YOUR OWN RISK!. If damage or destroy the Prg.
something is that your Problem not mine.

1.3 Requirements

MEReset need OS2.0 or higher (min. OS2.1 to use Locale) and a AMIGA and nothing more.

MEReset is only testet on a AMIGA 500 (OS2.1, 3 MB RAM, 520 MB AT-HD).

1.4 What do MEReset??

MEReset is a small Commodity, which can reset your Computer (system confom!).

MEReset have an small ARexx-Port (Name MERESSET.REXX):

- Ende

This cmd cancel the Program.

- Reset x,y

This cmd reset your Computer, with this parameters:

x:

0 with Sure-Requester

1 non Sure-Requester

y:

0 with Countdown

1 non Countdown

z.B.:

- Reset 0,0 or Reset resetet the Computer with Sure-Requester and Countdown.

- Reset 1,1 resetet the Computer immediately (CAUTION!DANGER!).

- Abbruch

Cancel the Countdown.

1.5 Using

I think it is very easy...

Tooltypes:

SICHER - befor an Reset an Sure-Requester will popup.

ZEIT - the time for the Countdown.

and the normal

CX_HOTKEY,CY_POPUP,CX_PRIORITY

The CLI/Shell-Version has only the Parameter ZEIT=,
(for the Countdown) but the Countdown will not shown.
(This comes in the next version).

1.6 Installation

You must only use the Install-Script to install the
Program.

1.7 History

Version 1.0:
The first Version of this meaningful Program.

Version 1.1:
Small korekturs and a Sure-Requester build in.

Version 1.2:
A ARexx-Port and the Count-Down build in.

Version 1.3:
The Reset-Count-Down can now canceld, the ARexx-Port Name
is now >> MERESSET.REXX <<.
