HTML ASSISTANT PRO 3

The Award Winning Web Page Editor

NEW! Convert formatted word processor files to HTML
Check the "File" menu for the "Import word processor file" option

NEW! Built-in HTML Viewer
To use the viewer simply check the box on any edit window button bar

NEW! *QuickFrames* (TM)
Create Frame pages in seconds -- really! See the "QuickFrames" option in the "Special" menu

NEW! Multiple file replace
Now it's fast and easy to replace text in any number of files. You can quickly change a file name or directory in all your web site pages. Try the "Multiple file replace..." option in the "File" or "Edit" menus.

NEW! *Instant* web publishing
Easily and inexpensively post and promote your Web site. Publish pages on the Web with the *LinkStar Site Launcher*(TM). *Site Launcher* automates the process of uploading your Web site, instantly creating and displaying your URL (or Web address), and submitting your URL to most major search engines. Now, visitors can easily find you on the Internet.

Contact sales@brooknorth.com for information about how to get a free copy of *Site Launcher*.

When you run *HTML Assistant Pro 3* with *Site Launcher* installed, you will see a "Publish" item on the main menu bar. This will permit you to use *Site Launcher* to quickly put your pages on the Web -- without leaving the editor!

NEW! Automatic file save and backup

HTML Assistant Pro can save your files automatically so that valuable work won't be lost. See the "Automatic file save" option in the "File" menu.

Backup copies are created for all files loaded into HTML Assistant Pro, making it easy to revert to an earlier version. All backup files are stored in the "proback" subdirectory of the HTML Assistant Pro program directory.

Also included with this version of HTML Assistant Pro:

A WYSIWYG *Background Assistant*(TM)

A powerful *URL Assistant*(TM)

Toolbar support for HTML 2 and HTML 3 features including Forms and Tables

Edit files of any size

Picture preview

Improved Undo and Redo - 255 levels!

Right mouse button support

Floating User Tools

Floating tag tool bar

Dynamic Data Exchange with *Netscape* (and with *MS Internet Explorer* as soon as *Explorer* supports DDE)
