

From the

SCalc calculator program!

++SCalc Readme File++

SCalc is a simple free calculator program written by Scott Feeney. SCalc is capable of everything standard calculators will do, including decimals. Using the menu bar, you can view the About Box with program information, get help on SCalc, exit, and change the background of the readout display. If when you choose Exit and it takes a few seconds, that's normal so don't worry. The author can be contacted with E-mail at: scott_feeney@prodigy.com.
