Mastering the Magic of Painter
with
Jeremy Sutton

Welcome to the wonderful world of Painter 5.

My name is Jeremy Sutton. I have been using Painter since 1993 to create digital portraits and animations. You may have seen me demonstrate Painter on the Fractal Design booth at trade shows over the last few years. I am the author of the book Fractal Design Painter Creative Techniques (Hayden Books 1996, ISBN 1-56830-283-5). This book shows in simple one page step-by-step sections how over 50 different artist and designers from around the world have used Painter to create interesting effects in their artwork. They share their tips and techniques. The book is in full color and is intended to inspire you to try out new ideas. Although written for Painter 4, many of the techniques are applicable in Painter 5. It is available in local book stores and via the on-line bookstore Amazon.com.

I teach Painter workshops and am organizing on-line training in Painter 5. The on-line Painter class will be project-based with assignments covering the main areas of Painter including navigating and customizing the interface, applying and customizing brushes, customizing textures and patterns, applying and editing plug-in floaters, creating mosaics, transforming existing images, recording and playing back scripts, creating and manipulating collages. I always encourage my students to experiment, to be passionate with their creative projects, and to take risks. If you are interested in any of my classes, or knowing about further Painter books or tapes that I produce, please visit my web site <http://www.portrayals.com> and look under the section entitled Learning. On my web site you'll also find samples of my art and animation, Painter tips and information on output.

You are welcome to contact me via e-mail at jeremy@portrayals.com.

Enjoy Painter!

Best regards,

Jeremy Sutton

PS Following are some examples of my Painter artwork for your interest.
