Throw away that Fractal Design Painter 5 manual!

Quit scratching your head over Painter 5 and let graphics software guru Andrew J. Hathaway use his easy going style to demystify this complex but rewarding application. In over 8 hours of lessons Andrew will force you to understand such confusing concepts as Composite Methods, Method Subcatagories, Floaters Mask and other brush minutia.

VTC's Training CD for Fractal Design Painter 5 uses hours of QuickTime movies with voice-over narration to take you through the learning curve step by step. The dozens of movies on this CD can be played in order or at random. You can start, stop, fast-forward and rewind each movie, or click the continuous play button for hands-free viewing. We have also included a search engine to aid in finding information on a specific topics. Jump between the training CD and Painter to follow along with the lessons and practice what you are learning. Tons of expert training and quick access to information make this a complete training package.
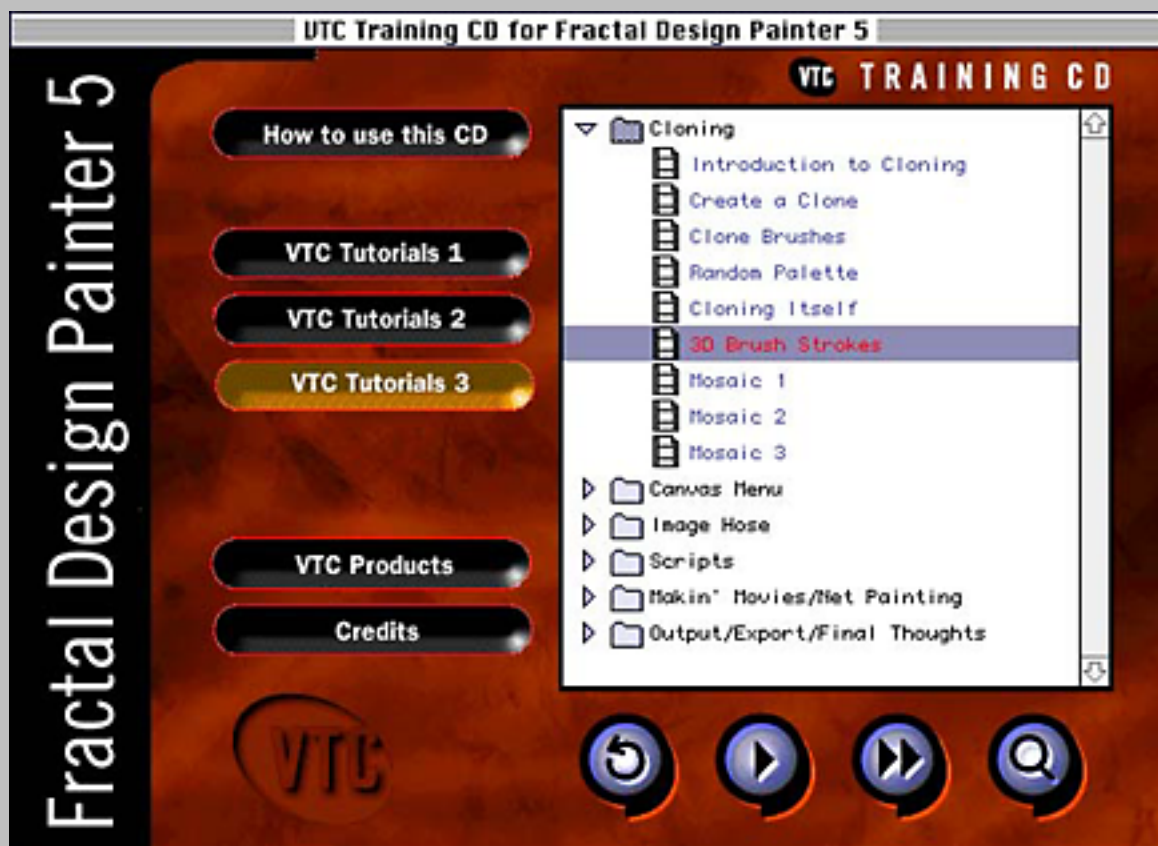

The best part is that all this can be yours for just $49.95. Compare that price to taking classes or buying those silly video tapes!

All CDs can be played on Macintosh, Windows 3.1, Windows 95 and Windows NT

VTC customers gush over our products

" ... over the New Year I took VTC's Fractal Painter Training CD home to show my mother (the computer nerd in the family). She thought it was great, and she loved the voice of the trainer. 'I'll do anything he says!' was the comment."

    -- Jennifer Curran, Delmar Publishers, Albany, NY

"Bravo VTC! I give VTC four stars and two thumbs up! Now everything I need to know is just a few mouse clicks away. Using your products is easy and fun--they really bring the information to life! Thanks to you my boring old computer manuals are now collecting dust. I'm thinking of using them to light the barbeque. If VTC training movies ever go to the big screen I'll be sitting front row with a bucket of popcorn, you bet."

    -- John Mariani, San Jose, CA

"... [Your products] are the best investments I've ever made. I attended a computer school to get started with the Mac, and after paying $1,100 for hands-on training, I found it impossible to remember everything we'd covered. Your CD included more information, in an easier-to-understand presentation, than the many weeks of school I attended. It also gives me an instant reference for all the things I am trying to learn ... It's like having a private tutor built right into my computer."

    -- James T. Axworthy, Woodridge Press Inc., Anaheim, CA

"I purchased the Painter 4 CD from VTC. I first heard of your company from a review in the "Computer Link," a section of the San Diego Union Tribune. From there I checked out your web site, and got your phone no. John (Heck, vice president) and Rochelle (Carrera, administration manager) were very helpful and courteous when I called with a problem installing the CD. Thanks again!"

    -- Jay R. Steele, Photographer, Graphic Artist, Teacher, San Diego, CA
