TealDoc is an advanced reader for standard Palm doc files, but supports advanced features which sets it apart from other document readers. This document demos some of the possibilities, and requires TealDoc 4.0 or greater. <HRULE Y=2><HRULE STYLE=OUTLINE X=70

WIDTH=20 HEIGHT=6> <BOOKMARK NAME="Images"><HEADER TEXT="Images" ALIGN=LEFT STYLE=UNDERLINE FONT=1> <TEALPAINT SRC="DemoIm" SY=25 WIDTH=65 HEIGHT=67 IMAGE=13> TealDoc supports images in TealPaint format, which can be created using the TealPaint Image Manager included as part of the TealPaint package. Images are a nice way to illustrate an otherwise plain document.

TealDoc also supports linking to oversized images, which permits the inclusion of illustrations and tables that ordinarily would not be viewable on the small Palm screen. <LABEL
