

How would you like

- a **FREE** batch of **10000 Hipparcos stars** for your Data Extensions Menu?
- a **FREE** batch of **25000 SAO stars** for your Data Extensions Menu?
- a **FREE** file of **over 300 extra star names** for Stella 2000 to load?

Yes?

Well, to earn the special bonus of your choice, all you need to do is **persuade a friend**, acquaintance, colleague, or deadly enemy **to register their copy of Stella 2000**; or place a pristine SHAREWARE stella.zip into their hands and THEN persuade them to register it; at the same time leaving them in no doubt that **they in their turn can benefit in just the same way as you** have, and thus carry forward the torch of superlative astronomy software with a torrent of free gifts...

Once you've achieved that superhuman task, just **fill in the boxes below with the full name of the person who is about to register**, and click the **[submit buddy]** button. Your **FREE Stella data extension** will be winging its way to you over the Internet the instant we log that person's order.

Remember, this is a **STANDING OFFER** - we call it the 'Buddy Incentive'. So the more punters you can put our way, the more extras you'll be in line for. And we'll be adding to the list as time goes on.

Interested? When all's said and done, all you're being asked to do is think about it. That, and **GET WORKING**, of course ;-)

May the best buddy win. Kind regards,

Roger Hughes,
Swimming Elk Software.
