Configuring an INFORMIX Data Source

Data Source Name: A string that identifies this INFORMIX data source configuration in ODBC.INI. Examples include "Accounting" or "INFORMIX on Serv #1."

Description: An optional long description of a data source name. For example, "My Accounting Database" or "INFORMIX tables on server number 1."

Database Name: The name of the database to which you want to connect by default.

Database List: The list of databases that will be available in the logon dialog box. Separate the names with commas.

Cursor Behavior: Select Preserve if you want cursors to be held at the current position when the transaction ends. Otherwise, leave this set to Close. Selecting Preserve may impact the performance of your database operations. This value is optional.

Translate: Displays the Select Translator dialog box to allow you to perform a translation of your data from one character set to another. Choose the INTERSOLV OEM ANSI translator to translate your data from the IBM PC character set to the ANSI character set.

Logon to INFORMIX 4

Database Name: Enter the name of the database you wish to access or select the name from the Database Name box, which displays the database names you specified in the Setup dialog box.
