

To play the Simutronics games you will need to install the Simutronics launcher. This launcher will work with both Netscape 3+ and Internet Explorer 3+ web browsers.

The launcher will determine whether you have all of the software necessary to play each game. If you do not, it will automatically download and install the latest version.

To install the Simutronics launcher, click on the "Launcher" button to the left and select the install button on the next screen.

Once you have installed the launcher, select and install the software for each of the Games you want to play, from the list to the left.

To access the Simutronics Games Channel, go to [www.gameszone.net](http://www.gameszone.net) and go to the Central Departure Lounge. Click on the Simutronics teleport.

Within a few seconds, the Simutronics games channel will appear. Click on the logo of the games you want to play for more info about that particular game.

Click 'play' to start a game.
