

Welcome to a huge, enchanting world of fantasy, danger and intrigue - swarming with characters unique and fanciful, boisterous and brave! A mythical meeting place of hissing S'Kra and demure Elvenkind, where even the haughtiest Elothean can find companionship with a towering Gor'Tog. Welcome to DragonRealms!

DragonRealms - a spin-off of Simutronics' immensely popular GemStone III - is one of the most sophisticated, text-based, fantasy role-playing environments online, and a unique and exciting adventure. DragonRealms is your doorway to the mythical and stormy realm of Elanthia - filled with a vast range of characters culled from common and new fantasy races, where multiple cities and lonely wilderness provide never-ending opportunities for exploration. You choose the path you wish to follow as you battle the dangers in the dark forests, murky swamps and abandoned castles of this rich, imaginary world.

To play Dragon Realms you will need to have already installed the Simutronics launcher. In addition to this, you will need the Simutronics "Wizard front end". This is the interface for the game. This wizard front end is also used for GemStone III and Modus Operandi; you only need to install it once. Click on the install button below to install the "Wizard front end", and "launcher" to the left to install the launcher.

The Simutronics games channel also includes dedicated chat and message boards. To access these you will need the Simutronics Chat and Message board clients. To install these, please click on Chat or Message Board buttons below.
