License Agreement

+ This software *(Compass 2.x)* is SHAREWARE.   You may evaluate this software for 50 days without any obligation.   Use after 50 days requires purchasing a license.

+ This software is distributed AS IS and without any express or implied warranties.

+ The author is not responsible for any damages whatsoever incurred before, during, or after the use of this software.

+ This software cannot be resold or used in any profit-generating activities without the author expressed written permission.

+ This software may be freely distributed, provided that:

a. Such distribution includes only the original archive.   You may not alter, delete, or add any files in the distribution archive.

b. No money is charged to the person receiving the software, beyond reasonable cost of packaging and other overhead.

Single-User License:

Each Single-User License allows:

The registered user and ONLY the registered user to install and run the software (*Compass* 2.x) on any number of workstations. When the registered user does not plan to run the software on a workstation, he/she must remove the software (including the registration file) from the workstation.   A registered user must be a person and can not be a company or an organization.   The software may not be installed on a server computer.   To install the software on a server computer, you must purchase enough number of Single-Workstation Licenses (see below) to cover all workstations that have access to the server.

Single-Workstation License:

Each Single-Workstation License allows:

Any number of users to run the software (Compass 2.x) on one and ONLY one workstation.   The software may be installed only on one workstation.   If the user wants to run the software on another workstation, he/she must remove the software (including the registration file) from the original workstation BEFORE he/she installs the software on another workstation.   If the software is to be installed on a server computer, you must purchase enough number of Single-Workstation Licenses to cover all workstations that have access to the server.   For example, if there are 10 workstations, which have access to the server, you need 10 Single-Workstation Licenses to be able to legally install the software on the server.
